

ENIDINE products range from large bore hydraulic damping devices to miniature shock absorbers, adjustable and non-adjustable shock absorbers, rate controls, wire rope isolators, and air springs showcase a variety of market focused designs for P.E.T. Manufacturing, Plastic Bottle Making, Blow Moulding, Automotive Manufacturing, Assembly Line Conveyors, Pick & Place Robotics, and Material Handling applications.

Applications Include:

- Gantry robots
- Fabric automation
- Special machines
- Paper / Woodworking machines
- Machining centres
- Automated storage
- Retrieval systems
- Overhead bridges
- Trolley cranes
- Machine tools
- Robotics
