

We are a New Zealand business that provides quality solutions in industrial compressors and pneumatic automation to businesses in the lower North Island. We have branches in Palmerston North and Wellington. Our customers return to us as we deliver professional results, supply quality products and are experts in our field.

At Compressed Air Controls we specialise in the following four main areas:

-

[Design:](#) We are experienced in all areas of pneumatic design and provide innovative turnkey solutions. [Click here for some examples of the applications we have designed for businesses](#)

-

-

[Supply:](#) We are suppliers of high quality brands in the compressed air industry. You can read about our main brands [MAC](#) and [KAESER](#) here.

-

[Installation:](#) We have experienced qualified Service Technicians who can organise all or part of an install, anytime of the day. We also have on-road Sales Representatives and Technical Consultants available to visit at a time that suits your needs.

-

[Repairs:](#) We have on-site and workshop facilities for routine services and 24/7 callouts. Our state-of-the-art sophisticated database contains our customer's service history, their equipment and components, and provide our technicians when their next service is due. Our vans are fully equipped to be able to service any common maintenance job - saving our customers time and money. [Click here to read about some of the maintenance services we offer.](#)

Whatever your business requirements, Compressed Air Controls can help. Contact us today for more information on 0508 763 862.
